

Instrument Care

A simple guide

- Do get the instrument out as often as possible. This helps to keep the instrument working.
-
- Make sure the instrument always goes back in the case after use.
-
- For hygiene reasons only you should play the instrument.
-
- Don't bang the mouthpiece in. It will get stuck!!!! If it does bring it in to school. Mr Penfold has a mouthpiece remover that doesn't hurt the instrument as you pull it out.
-
- If something doesn't work, or breaks with your instrument. Bring it into school. Do not take it to a music store or instrument repairer. Mr Penfold will be able to fix most things.
-
- Please do not unscrew the valves. This is the most common issue. If the valves stick bring the instrument into school. Do not try to fix it yourself.
