

12<sup>th</sup> September 2022

Dear Parents and Carers

### **Year 8 Food Technology 2022-23**

Welcome back to food technology!

This year will see some changes for us in food technology. This is to facilitate all pupils taking part in all 3 areas of Design Technology; Food Technology, Textiles and Resistant Materials, and will take the form of a rotation system.

All Year 8 pupils will experience 2 hours of Food Technology each fortnight for a period of 12 weeks to facilitate 6 lessons in total; one theory and 5 practical. Year 8 will only cook on week 2 of the two-week timetable.

**8S, T, U and V will cook on a Tuesday week 2 and 8W, X, Y and Z will cook on a Wednesday week 2.**

To give them the best possible experience and to maximise their cooking potential, all lessons will be practical based with all subject knowledge being learnt through a knowledge organiser for homework.

In Year 8 pupils will recap diet, nutrition and health and celebrate cultural diversity and catering for peoples individual needs, looking at how people's food choices can be impacted by a number of factors including religion, dietary needs, cultures and cuisines and dietary trends. They will learn about food provenance and processing, food preservation and take part in a cookie invention test to understand how to use the flavour star to balance and enhance flavours.

As per the National Curriculum, all pupils will be expected to participate in each of the 6 lessons, which are specifically tailored to mastering basic, transferrable cooking skills which they will develop throughout the rotation and further develop in Year 9. As such, failure to bring ingredients in for Food Technology lessons will result in sanctions being applied to individuals.

To assist in the preparation of ingredients, your child will be bringing home a recipe booklet during the first week of their rotation, which details all the recipes and dates for each one. **All ingredients MUST be weighed and measured at home and brought in in named containers. This is to maximise the cooking time we have in lessons.**

I am aware that some recipes may not suit all dietary needs and in such cases we will work together to modify recipes that demonstrate the same transferrable skills and can be produced in the same timescale. Please email me with any specific needs so that I have time to discuss and amend as necessary.

I am also very aware that the past 2 years have led to many struggling to provide equipment and ingredients due to the pandemic and cost of living increases. The school does have access to a hardship fund should you find yourself in this position. A form can be obtained from the school office should you require it.

That just leaves me to say, I hope that your child has a very enjoyable food technology rotation and that you are able to experience some tasty offerings on their return home!

Should you have any queries please don't hesitate to contact me via the school office on 01020 696121 or via email: - [l.harrison.st@bmsweb.co.uk](mailto:l.harrison.st@bmsweb.co.uk).

Yours sincerely

Mrs L Harrison  
Food Technology Teacher
